**Implementing and test of STTRIPS operators

** Good implementation, however You haven't given any suggestions for improvements ; ; you should use the same operators for the two scenarios and the same initial state except specifying whether there is a snake or not. Excellent report - I really like your use of figures to communicate your ideas. ; =30/60;;

Report - documentation of results ; ; ; =20.00/20;;TOTAL =11.72/18.75=62.50%
